CAREER SUMMARY:

Experienced Full Stack Developer with a comprehensive background in both front-end and back-end technologies. Proficient in designing, developing, and maintaining web applications, ensuring seamless user experiences and robust server-side functionality. Skilled in collaborating with cross-functional teams to deliver high-quality software solutions.

PROJECT AND WORK:

1. Crypto Tracker App | [Link](#)

Technologies used : React.js, Tailwind CSS.

Provides live updates on the prices of various cryptocurrencies such as Bitcoin, Ethereum, and thousands of altcoins.

Displays price changes over different time frames (e.g., hourly, daily, weekly).

Provides historical price data and interactive charts to analyze price trends over time.

2. Social Media Clone App | [Link](#)

Technologies used : Node.js, Express.js, MongoDB, React.js, Tailwind CSS.

Allows users to create personal profiles with details such as profile pictures, bios, location, and personal information.

Users can interact with posts through likes, comments, and shares.

Offers search functionality to find friends.

Enables users to connect with others by adding them as friends or following their profiles.

SKILLS:

- **Frontend** : HTML, CSS3, Java Script, React.js, Tailwind CSS, Material UI
- **Backend** : Node.js, Express.js
- **Database** : MongoDB, MySQL
- **Tools** : Git, Visual Studio Code
